

2009 OCESS Mission Permission Form

Student: _____

Mission Classification: _____

The space sim mission will take place from April 27th to May 2nd this year. In order to participate in the mission, students must obtain permission from parents and teachers. We apologize for how late this form is being presented to you. Our mission schedule has been uncertain as we have been working to complete construction of our new spacecraft. Even at this date, we are not certain how much of the construction process will remain to be completed by April 27th. If you have any questions or concerns, please contact Dr. Magwood at jim.magwood@ocdsb.ca

There are three groups of students participating, each with different demand on their time.

Astronauts

Astronauts will have to stay in room W027 at 440 Albert Street (the Albert Street Education Centre) **for the duration of the mission**. They should make an effort to get ahead in their school work during the weekend before the mission and to get caught up after the mission is completed. Time in the mission plan is set aside for doing homework. Time also can be set aside for writing quizzes and tests during the mission if a teacher deems this to be necessary. This can be done in an isolated room in the space craft with supervision by the adult supervisor over the network camera system.

Mission Control Staff and Simulators

These students will be assigned shifts each day as set out in the chart below. Simulators will work in room W027 at 440 Albert Street. Mission control staff will work in the sim office at Lisgar if our computer link is up and running in time. If it is not, they will work in W027 at 440 Albert Street. Parents will be informed of the location next weekend. These students are responsible for any missed work and should try to adjust their shift schedule to avoid missing important class-room activities if possible. However, it is necessary to have minimum staff of 3-4 mission control personnel and about 2 simulators on duty at all times during the day.

Thank you for your assistance and understanding,

Daisy Wong, Arthur Quang, Maclean Rouble
Commanders

J. Magwood
Teacher Advisor

Shift	Monday 27th	Tuesday, 28 th	Wednesday, 29 th	Thursday, 30 th	Friday, 1 st	Saturday, 2 nd

Date

Parent and Teacher Volunteers

One of the jobs necessary for the mission to take place is that of adult supervisors. An awake adult must be present in the spacecraft/simulator room (W027 at 440 Albert Street) at all times during the course of the mission (24 hours a day). The teacher advisor (Dr. Magwood) usually can be present in the afternoon and takes at least some night shifts.

If you can help out as an adult supervisor, please indicate at which times (either a full or part shift) that you can be present on the following chart. Your help is greatly appreciated and the time spent can be quite entertaining as you get to watch the mission unfold. A list of contact numbers, emergency procedures, and general operating procedures will be available in the mission control room where you will spend your time.

Times when Dr. Magwood definitely will be present are indicated in the chart below.

Dr. Magwood can meet with you to go over the duties and responsibilities that you will be taking on.

Many thanks,
The space sim students
